Oraș: Bucuresti

Despre mine

I am a creative and ambitious person with good analytical and communication skills. I have experience in collecting, cleaning, and analyzing data from different media sources. I can use advanced Excel, Google Analytics, and other tools to transform data into clear insights. I am adaptable, I like continuous learning, and I work well in a team. I am passionate about technology and innovation, and I want to apply my knowledge and improve my skills in a dynamic professional environment.

Junior Research Analyst - Aleph Media S.R.L

București | Cercetare - dezvoltare | Media / Internet

Collecting, cleaning, and analyzing audience data from multiple media sources (TV, Online, Social Media), contributing to the creation of accurate and easy-to-understand reports for clients.

Managing complex databases and analyzing information using advanced Excel (pivot tables, complex formulas, dynamic charts), optimizing reporting processes and reducing data preparation time.

Monitoring and evaluating the performance of marketing campaigns and distribution strategies, presenting results through reports and clear visualizations to support strategic decisions.

Using Google Analytics and other specialized media analysis tools to track online traffic, user behavior, and market trends.

Preparing detailed reports and presentations for management and clients, turning complex data into actionable insights.

Abilități și competențe dobândite:

data analysis, Google Analytics, pivot tables, report writing, database management, data collection, data cleaning, data visualization, EXCEL (advanced), Strategic Decision Support, complex formulas, Dynamic Charts, Media Analysis Tools

Educație

2024 - prezent	Masterat - Academy of Economic Studies Databases & Business Support București
2021 - 2024	Facultate - West University of Timișoara Economic Informatics Timisoara Final grade: 10
2017 - 2021	Liceu / Școală profesională - Novaci Theoretical High School Mathematics & Informatics Novaci

Abilități

Abilități generale

Junior Research Analyst, EXCEL (advanced), Power BI, Google Analytics, SAS, r studio, Python, SQL Server (SQL, T-SQL), Oracle SQL Developer (PL/SQL), MongoDB, ASP.NET Core MVC, Web Forms, HTML, CSS, JavaScript, Joomla, Wordpress, data analysis, data visualization, Exploratory Data Analysis (EDA), machine learning, logistic regression, decision trees, Random Forest, statistical analysis, Pandas, numpy, matplotlib, Seaborn, PLOTLY, Streamlit, R markdown, DAX functions, data cleaning, data filtering, pivot tables, Dynamic Charts, database management, report writing, presentations, Pearson Correlation Analysis, descriptive statistics, distribution analysis, outlier detection, data collection, complex formulas, Media Analysis Tools, Strategic Decision Support

Proiecte	Analysis of the influence of factors on job satisfaction in the IT field perioada Ian 2025 - Ian 2025 Conducting a statistical and machine learning analysis to identify the factors influencing employee satisfaction in the IT sector, using an extensive dataset obtained from Stack Overflow questionnaires (2024). Skills: Data analysis (processing, cleaning, and visualizing datasets), Machine Learning (implementing logistic regression, decision trees, and Random Forest models), Statistical analysis (exploring and interpreting relationships between variables), R & R Markdown (writing reproducible code for analysis and reporting), Interpretation (translating results into relevant insights for decision-making). Link: https://github.com/alexandraa25/Analiza-datelor-folosind-R-Markdown Interactive Exploratory Data Analysis (EDA) Dashboard using Streamlit perioada Ian 2025 - Ian 2025 Developing an interactive web application for exploratory data analysis, enabling dynamic data loading, filtering, statistical exploration, and visualization of datasets in CSV and Excel formats. Skills: Data analysis (loading, cleaning, filtering,
----------	--

and exploring structured datasets), Exploratory Data Analysis (EDA) (descriptive statistics, distribution analysis, missing values assessment, and outlier detection), Data visualization (creating interactive histograms, boxplots, bar charts, scatter plots, and correlation heatmaps using Plotly), Python programming (using Pandas, NumPy, Matplotlib, and Seaborn for data manipulation and analysis), Web application development (building an interactive dashboard with Streamlit, including real-time filters and user-friendly interface), Statistical analysis (correlation analysis (Pearson) and interpretation of relationships between numerical variables). Data analysis using the questionnaire-based investigation method (Bachelor thesis)

perioada Ian 2024 - Ian 2024

Identifying eMAG customers perceptions regarding their online shopping experience. Methods: Used Microsoft Power BI for importing, modeling, and visualizing questionnaire data. Results: Created interactive dashboards that highlighted consumer trends and the effectiveness of marketing campaigns. Skills: Data analysis and visualization with Microsoft Power BI, Importing and modeling data from diverse sources, Creating interactive dashboards and reports, Using DAX functions for advanced calculations, Presenting data visually to support business decision-making.
